The market capitalisation of the 78 stocks in the ACT Australian CleanTech Index is A\$11.3 billion falling from its peak of \$16.3 billion in July 2007.

The month's performance was driven by poor results from Infigen Energy, following the failure of its AS asset sale, Sims Metal Management, Geodynamics, Coffey Environments and Carbon Conscious, following the withdrawal of the CPRS. The results were partially offset by strong results from Dyesol, Sylex Systems, Galaxy Resources and Orocobre.
