The market capitalisation of the 77 stocks in the ACT Australian CleanTech Index is A\$10.2 billion falling from its peak of \$16.3 billion in July 2007.

The month's performance was driven by poor results from Quantum Energy, Infigen Energy, Island Sky, Transpacific Industries and Carnegie Wave Energy (in reaction to its failure to secure the REDP funding). The results were partially offset by strong results from WHL Energy, Solverdi Worldwide, Mission NewEnergy, Dolomatrix and Pro-Pak Packaging.

The ACT Australian Cleantech Index is updated each month and published on the Australian CleanTech website at [www.auscleantech.com.au](http://www.auscleantech.com.au), in the Ethical Investor magazine, WME's Environmental Management News and the London based Cleantech Investor.
