

Company	Presenter	Cleantech Sub-sector	Overview
---------	-----------	----------------------	----------

SCN Pitches – 20 May 2010

Oceanlinx	Ali Baghaei Colin Parbery	Wave	Oceanlinx Limited – an Australian company – providing renewable energy technology solutions utilising ocean wave power, with a 3 rd generation pre-commercial unit located in Port Kembla, grid connected to Integral Energy and producing energy. www.oceanlinx.com
Spark Solar Australia	Dr Michelle McCann	Solar	Spark Solar Australia is progressing its module production facility in Canberra as a first step towards producing premium-quality silicon solar cells in Australia. www.spark solar.com.au
BuildingIQ	Mike Zimmerman	Efficiency	BuildingIQ is a company offering a revolutionary Energy Management System technology to reduce energy cost and emissions in new and existing commercial buildings. www.buildingiq.com
Barefoot Power	David Hind	Solar	Barefoot Power's business is to help alleviate poverty by providing affordable and sustainable lighting systems to households in developing countries. www.barefootpower.com
EcoDisc	Glen Whiteman	Materials	EcoDisc: A revolutionary new DVD disc that will reduce your carbon footprint and save you money! www.ecodisc.com.au

SCN Pitches – 8 April 2010

Global Carbon Systems	Andrew Lamble	Carbon	CarbonSystems helps organisations harness the intelligence they need to maximise performance in a carbon economy.
Aerogenesis Australia	Warren Kalinko	Wind	Aerogenesis is commercialising a 5kW small wind turbine, for both on-grid and off-grid applications, which is set to become a leading small wind turbine in its class.
SolarIncs	Matthias Anker	Solar	SolarIncs, the clear solution for building-integrated solar energy that architects choose, environmental bodies demand but owners love.
ENenergy	Hans Bjornenak	Biomass	A company that has developed an integrated biomass to cellulosic ethanol business model that leverages a breakthrough in biomass processing technology and development of large scale biomass production facilities to deliver low carbon transport fuels, energy and other valuable by-products at prices cheaper than today's fossil fuels.
Fuel Concepts	Lee Peterson	Vehicle Technologies	Fuel Concepts is an Australia based company that is the worldwide licensee and distributor for a patented technology (founded by Fuel Concepts of America) that substantially reduces fuel consumption and carbon emissions for any gas-electric vehicles.

Company	Presenter	Cleantech Sub-sector	Overview
---------	-----------	----------------------	----------

SCN Pitches – 11 February 2009

Intec Ltd	Dave Sammut, Philip Wood	Recycling	Intec is a listed Australian technology company with patented applications and developing projects for the recycling of industrial wastes in Australia and China.
Novarise Renewable Resources International	Philip Au	Recycling	China's leading polypropylene (PP) recycling company that is seeking to list on the ASX in March 2010
CleanFutures AquaSens	Kristin Alford	Sensing	CleanFutures AquaSens is commercialising the AquaSens biosensor, which provides an innovative global industry solution for portable, real time, highly sensitive testing for the water and wine industries.
Envirability	Graeme Philipson	Research and advisory	Envirability (formerly Connection Research) is a market analyst company specialising in sustainability research, advisory services, publishing and training.
Pacific Pyrolysis	Adriana Downie	Carbon Solutions	Pacific Pyrolysis Limited is commercialising award winning technology in the area of slow pyrolysis across the Asia Pacific region to meet the growing demand for green energy, biochar, and carbon abatement.
CleanPoint - selective energy	Bruce Johansson	Smart Grid	CleanPoint selective energy is an Australian company that has developed what is being described as Smartgrid 2.0. We are focussed upon offering utilities in developed and emerging countries affordable strategies that allow them to embrace Smartgrid with a minimum of risk.

SCN Pitches – 19 November 2009

BluGlass	Giles Bourne, MD	Energy Efficiency	BluGlass (ASX: BLG) is developing innovative semiconductor technology to reduce the cost of producing next generation high efficiency LED and solar cell devices.
BTOLA	Steve Rogers	Biogas	A global opportunity to halve the cost of micro-generation, with BTOLA's patent pending turbines that run on biomass, waste and more
Fuel Concepts	Andre Botelho, Chief Executive Officer	Vehicle Technologies	Fuel Concepts is an Australia based company that is the worldwide licensee and distributor for a patented technology (founded by Fuel Concepts of America) that substantially reduces fuel consumption and carbon emissions for any gas-electric vehicles.

Company	Presenter	Cleantech Sub-sector	Overview
Elemental Energy Technologies	Kim Lyle and Michael Urch (Joy Thurlow)	Wave/Tidal	'The SeaUrchin is an elegantly simple and efficient, environmentally-friendly, second generation marine vortex turbine generator offering major cost, performance and deployment advantages over the first generation marine technologies occupying the market place today'.
NEP Solar	Johan Dreyer (Emma Jones)	Solar	NEP Solar is a supplier of concentrating solar thermal collectors; its first product the PolyTrough is a parabolic trough collector aimed at the industrial heat market (up to 250°C) focussing on lowest cost per kWh delivered over the life cycle .

SCN Pitches – 22 September 2009

CMA Corp	Doug Rowe	Recycling	CMA Corporation Limited is a leading integrated Australian-based recycling group that provides products and services to customers across three continents.
Acoustica	Bruce Robins	Building Materials	Commercialising the world's best "Green" Noise Barrier - Quietwave® Captive Membrane Technology.
T3Energy	Paul Curtis	Energy Efficiency	T3Energy has developed a solar space heating and super-insulated building technologies will reduce energy consumption in homes by up to 80% while offering a competitive and compelling alternative to conventional homes.
Azure Energy	Jason Hopkins	Solar	The Azure Energy ALI system produces seven forms of energy from Solar Energy, in all weather conditions
Universal Power Storage	Bruce McWilliam	Energy Storage	Universal Power Storage (UPS) has the only invention in the Massive Electrical Storage (MES) space that can potentially deliver the largest scale electrical storage system in the world: rectifying the largest market failure in the electricity market – base load storage.
